

MUELLER

R-290 E-Star[®] Condensing Unit

Cut costs with eco-friendly
R-290 refrigerant.

Stay ahead with E-Star.
Designed for tomorrow's
green standards.

Partner with Mueller® for your Environmentally Friendly, Future-Proof Cooling Solutions.

Our R-290 E-Star Condensing Unit is designed for efficiency, reliability, and sustainability. We deliver the highest quality, easiest installation, and best-in-class customer service.

- Low investment as compared to carbon dioxide (CO₂) and ammonia (NH₃) options
- ***Designed for compatibility with all current & future models of Mueller milk coolers***
- GWP (Global Warming Potential) = 3
- Approximately 30% increased energy efficiency (based on industry refrigerant studies plus our E-Star subcooling refrigeration system)
- Automated Electronic Software Driven Valves
- Reduced Environmental Footprint
- Weather-proof housing designed for outdoor use
- Designed to meet standard EN 378-2 for the safe design, construction, and operation of flammable refrigerants
- Best-in-Industry Customer Service

Our R-290 E-Star Condensing Unit offers an eco-friendly and highly efficient solution to your needs. With its low GWP, easy installation, and durable design, it integrates seamlessly with our cooling and storage equipment, ensuring your operation is efficient, reliable, and sustainable.
