

Your entry to success

They go by several different names: manways, manholes, access ports, and hatches, but their function is the same. Giving your customers access to the interior of the vessel, critical for their operations. With a manway, tank maintenance such as periodic cleaning, inspection, and servicing will keep their vessel in peak working condition.

Paul Mueller Company offers manway closures in a variety of styles and sizes to fit your specific requirements for tanks and vessels in a variety of industries. Our manways closures are available for single-wall or insulated tanks and all feature hand-crafted, stainless steel construction. We have standard and custom designs available for your unique needs.

Notes

PAUL MUELLER COMPANY

PAUL MUELLER, OUR FOUNDER

At Paul Mueller Company, we are united by a belief that the only quality that matters is quality that works for life. With every piece of processing equipment we build, our goal is to have lasting impact. This collective vision has led us from a small sheet metal shop to a global supplier of heating, cooling, processing, and storage solutions. Our equipment allows farmers, food producers, and engineers to keep their products fresh and their inventory strong. Whether our equipment is a small piece in your big picture or the critical component for your final product, together we are making an impact across the globe.
